PROFESSIONAL SUMMARY

Hardworking Artificial Intelligence and Machine Learning graduate with practical exposure to data analysis, requirement understanding, and solution documentation through internships and academic projects.

EDUCATION

Bachelor of Technology - Artificial Intelligence and Machine Learning

Annamacharya Institute of Technology and Sciences | CGPA:8.31

Intermediate (MPC)

VignanaSudha Junior college | Percentage : 69%

Secondary School Certificate(SSC)

ZPHS Gangamma Gudi | Percentage : 98%

Oct 2022 - April 2026

Tirupati, India

June 2020 - April 2022

Chittoor, India

June 2015 - June 2020

Chittoor, India

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript
- **Frameworks:** Flask (Basic), Django (Basic)
- **Machine Learning & NLP Tools:** Scikit-learn, NLTK
- **Development & IDE Tools:** Jupyter Notebook, GitHub, VS Code, Eclipse

INTERNSHIP EXPERIENCE

SmartBridge Educational services Pvt.Ltd | Full Stack Development (MERN) Intern 09/2025-03/2026, Remote

- Worked on the Shopee project using MERN stack technologies.
- Contributed to frontend and backend development, API integration, and database operations.
- Assisted in debugging, feature implementation, and improving application workflows.

SmartBridge Educational services Pvt.Ltd | Gen AI with IBM Cloud Intern 05/2025-06/2025, Remote

- Analyzed urban datasets to understand functional requirements for a Smart City Assistant platform.
- Supported development of data-driven features for forecasting and sustainability insights using Python.
- Documented system workflows and assisted in aligning technical outputs with end-user needs.
- Collaborated remotely with mentors to review functionality and improve usability of insights.

Slash Mark IT Solutions (OPC) Pvt.Ltd | AI Intern 06/2025-08/2025, Remote

- Worked on a Python-based plagiarism detection system by analyzing problem statements and expected outputs.
- Implemented TF-IDF and cosine similarity to evaluate text similarity across documents.
- Assisted in testing, validation, and refinement of feature logic to improve accuracy.
- Prepared clear explanations of system behavior for academic and non-technical users.

PROJECTS

Automated Parcel Damage Detection using Computer Vision & Deep Learning - Python | TensorFlow | ResNet | Django | OpenCV

- Developed a deep learning-based parcel damage detection system using CNN and ResNet architecture for image classification.
- Implemented image preprocessing, feature extraction, and classification to identify damaged and intact parcels.
- Integrated the trained model with a Django web application for real-time image upload and prediction.
- Applied techniques such as convolution, pooling, residual learning, and softmax classification for accurate detection.
- Generated prediction results with confidence scores to improve shipment quality assessment and automation.

Sentiment Analysis of Restaurant Reviews - Python | NLTK | Bag of Words | Multinomial Naïve Bayes

- Built an NLP-based sentiment classification system to analyze customer reviews.
- Performed text preprocessing, feature extraction, and model training.
- Evaluated results and documented insights to explain sentiment patterns clearly.

CERTIFICATES

- Python And Flask Framework Complete Course -Udemy
- Java Full Stack Certification-Wipro TalentNext – Digital Skills Readiness Program | Jul 2025 – Oct 2025
